

LOWER BUCKS COUNTY CHAMBER OF COMMERCE

EMPLOYEE ASSISTANCE PROGRAMS - ADVANCING PRODUCTIVITY & PEOPLE

Employee Assistance Programs are designed to enhance productivity by assisting employees and their immediate family dependents in identifying and addressing personal concerns including, but not limited to, individual, marital, family, emotional, stress, alcohol/tobacco/drugs, and communication issues which may affect job performance.

Lower Bucks County Chamber of Commerce members with fewer than 50 employees have access to the following services through the area's premier community-based employee assistance service provider at a rate *discounted* by 15%. Services are also available to larger size company members at discounted rates depending upon workforce size. Identify yourself as a Chamber member when you call!

Services include promotional materials, 24/7 nationwide telephone access, short-term problem solving counseling (up to three visits) at area locations, referral to established resources, and one on-site orientation.

Having an Employee Assistance Program (EAP) is a benefit to the company and the workforce. Everybody wins when productivity is enhanced by decreasing absenteeism, managing stress, and improving safety. We all need a little help over the rough spots now and then. Put us to work for your company.
